Update Status

Week Report

Each URL download all the symbols or pages are store in:

- X:\ProgramName\Results\ResultsName\URL\

Each day all the symbols or pages are stored with the a folder of that date.

- X:\ProgramName\Results\ResultsName\URL\29-Jul-2011\

This code will look at the current week at provide information of which days the code was executed. If the Day is TRUE, then the code has been executed since the folder is created, it does not mean however that the code finished succesffully, since it has no knowledge of the content of the folder.

The content under review is based on the ST_LAPTOP schedule tracker. This not currently reviwing everything. You may want to improve this.
